Education

2018-2023

Diploma in Engineering in
Computer Technology

Feni Polytechnic Institute, Feni

2016-2018

S.S.C

Feni Government Girls High School, Feni

Technical Skill

Comfortable with

React, MongoDB, Node.js, Express.js

Front-end

React, tailwind css, daisyUI, Material
UI

Back-end

Node js, Express js, mongoDB

Database

mongoDB

Interpersonal Skill

Dedicated, quick-learner, adaptable
with new technology, eager to take
challenges.

Projects

NexusNews(Fullstack-newspaper-website)

- **Comprehensive user management system:** Users can view all articles, add, edit, and delete their own articles. They can also subscribe to the website for different periods of time and update their profile information.
- **Powerful admin dashboard:** Admins can manage user role, approve or decline and delete articles, and add new publishers.
- **Security and technology:** User authentication is implemented using Firebase, and authorization is managed using JWTs. React, material UI used in front-end and express JS and mongoDB used in back-end.

Client-side-repo: <https://github.com/HalimaSaadia/NexusNews-client>

server-side-repo: <https://github.com/HalimaSaadia/NexusNews-server>

Time Period: .7 days

ServiceSquad(Offline-service-providing-website)

- **User-empowered service management:** Users can take any service, add, update, and delete their own services.
- **Real-time service status tracking:** Users can monitor and change the status of their services, whether pending, in progress, or completed, ensuring timely service delivery. Users can also view their booked services.
- **Security and technology:** User authentication is implemented using Firebase, and authorization is managed using JWTs. React, material UI used in front-end and express JS and mongoDB used in back-end.
